

Worldpay adds Android terminal from PAX to its SmartPay Series

**Worldpay, PAX and AEVI are revolutionizing the POS experience
by providing tailored, value-added solutions on handheld devices**

(PRC and Hong Kong, 23rd April 2018) **PAX Global Technology Limited** (HKSE stock code: 00327.HK), one of the world's leading electronic payment terminals solutions providers, is delighted to announce that Vantiv, now Worldpay, Inc. (NYSE: WP) is adding the handheld PAX A920 to its line of SmartPay Series™ terminals. These feature a single software platform providing a common user experience for merchants. SmartPay terminals also use a flexible Android-based operating system with pre-loaded business application bundles specifically designed to best meet a merchant's needs.

Jon Pollock, SVP of Product Management at Worldpay, said, "At Worldpay we strive to create solutions for merchants that meet the new and changing demands of their customers, which is why we created our SmartPay Series. By adding a variety of form factors, and now the handheld PAX A920, merchants can accept payments as well as streamline the same loyalty, payroll, inventory and sales tools across multiple smart devices."

With an open-solution design, powered by AEVI, Worldpay can offer its channel partners and merchants innovative terminals, all of which go beyond the POS with applications that will help grow revenue through loyalty and analytics tools.

Mike Camerling, CEO at AEVI, said, "From the outset, we've sought to deliver unique flexibility and choice to merchants, by enabling the PAX A920 to our app marketplace, we continue to do just that. We will continue to work with Worldpay to deploy our platform on more devices and provide even more business applications to further meet the needs of businesses in this changing payments landscape."

The sleek A920 Android Smart Terminal features a large colour touchscreen, fast thermal printer and full contactless capability, making it ideal for line-busting, pay-at-the-table and other trending payment methods. The PAX A920 is expected to be available from Worldpay starting in June 2018.

Andy Chau, President and CEO at PAX Technology, Inc (North America), said, "Our A920 was designed to be a secure Android platform with the horsepower to run the kind of innovative applications Worldpay and AEVI are using it for. We are excited to bring the most advanced Android payment solutions to Worldpay's merchants. Our device's compact and elegant design provides merchants with an easy-to-integrate solution that enhances their ability to run their business."
