Turnover generated from the China Market decreased by 30.9% to HK\$683.1 million for the year ended 31 December 2018, from HK\$988.6 million for the year ended 31 December 2017. The decrease was mainly due to the influence of the product mix shifting and the continuously keep price competition.

來自海外市場的營業額由截至二零一七年十二月三十一日止年度的2,602.5百萬港元增加43.4%至截至二零一八年十二月三十一日止年度的3,732.3百萬港元。截至二零一八年十二月三十一日止,海外市場營業額佔總營業額比截至二零一七年十二月三十一日止年度72.5%增長至84.5%。海外各分部業務均錄得增長,特別是LACIS地區。

來自中國市場的營業額由截至二零一七年十二月三十一日止年度的988.6百萬港元下降30.9%至截至二零一八年十二月三十一日止年度的683.1百萬港元。其下降主要是由於產品組合需求產生變化及持續激烈的價格競爭。

Services

Services income consists of income generated from the provision of maintenance and installation services and payment solutions services.

Turnover from services decreased by 47.8% to HK\$84.2 million for the year ended 31 December 2018 from HK\$161.4 million for the year ended 31 December 2017. The decrease was mainly attributable to the termination of the operation of the Group's non-wholly owned subsidiaries, Shanghai New Kashuo Information Technology Limited ("Shanghai Kashuo") and its subsidiaries (collectively, the "Kashuo Group") in 2017.

Gross Profit Margin

Gross profit margin for the year ended 31 December 2018 was 36.8%, representing a decrease in 380 basis points as compared to 40.6% for the year ended 31 December 2017. 服務營業額由截至二零一七年十二月三十一日 止年度的161.4百萬港元下降47.8%至截至二 零一八年十二月三十一日止年度的84.2百萬港 元。其減少主要由於本集團非全資附屬公司上 海新卡説信息技術有限公司(「上海卡説」)及其 附屬公司(統稱「卡説集團」)於二零一七年停 止運作。

毛利率

截至二零一八年十二月三十一日止年度的毛利率為36.8%,較截至二零一七年十二月三十一日止年度40.6%下跌380基點。下降主要由於對海外市場長期客戶提供之優惠及中國市場價格競爭激烈。

其他收入

其他收入主要包括增值税退税、定期存款利息收入及補貼收入。其他收入因利息收入的增加而輕微上升5.6%,由截至二零一七年十二月三十一日止年度的72.8百萬港元上升至截至二零一八年十二月三十一日止年度的76.9百萬港元。

銷售開支

銷售開支由截至二零一七年十二月三十一日 止年度的426.4百萬港元增加2.7%至截至二零 一八年十二月三十一日止年度的437.8百萬港 元。除去年同期錄得卡說集團之銷售費用後,銷 售開支隨營業額增長而大致上同幅增加。

Administrative expenses increased by 18.5% to HK\$590.8 million for the year ended 31 December 2018 from HK\$498.8 million for the year ended 31 December 2017. 海外市場

LACIS

In Russia, the rollout of the national "Mir" payment system and the 2018 FIFA World Cup contributed to significant growth of the electronic payment sector. According to the Central Bank of Russian Federation, the number of E-payment Terminals nationwide reached 2,465,898 as of October 2018, representing an increase of 12.6% when compared with 2,189,060 units in 2017. PAX terminals played an important role in payment during the 2018 FIFA World Cup, providing fans in and around stadium locations with convenient cashless payments.

EMEA

Across Europe, the Middle East and Africa, the Group has further strengthened its working relationship with acquiring banks and payment service providers. In recent years, some payment terminal companies operating in Europe have shifted their businesses focus towards the merchant acquiring and transaction processing segments, which has opened up opportunities for PAX to capture the terminal market share. In 2018, PAX recorded steady sales growth in many European markets including Italy, Belgium, Germany and Poland. Meanwhile, the Group also obtained important certifications in France, Spain, Denmark, Italy and the United Kingdom. Among these, the French Carte Bancaire 5.5 certification, the Italian PagoBANCOMAT certification and Common. SECC approval in the United Kingdom, have contributed to an important strategic breakthrough for the Group's European business expansion. Driven by ongoing technology upgrade of E-payment Terminals, major acquiring banks are replacing older generation with the more recent PCI 4.x and PCI 5.x versions, PAX has been experiencing growing demand for its products in Europe. In the Middle East and North Africa, PAX maintained its market leading position. In Egypt, PAX has recorded large volume sales for the second consecutive year. The Group continues to explore more opportunities in Western Africa, where E-payment Terminals solutions are still relatively underdeveloped.

APAC

The Asia Pacific region provided steady growth for PAX, with further expansion through the Group's newly established subsidiaries in Japan and India. Although cash payment is still the mainstream transaction method in Japan, the 2019 Rugby World Cup, the 2020 Tokyo Olympics, as well as the promotion of EMV migration and cashless society by the local government, will drive the significant growth of the Japanese payment market in the coming years.

Driven by Indian government's "Digital India" initiative, PAX has further partnered with numbers of the mainstream acquiring banks and payment service companies and recorded a strong sales growth during the year.

受惠於俄羅斯政府大力開發自身國家的支付系統「Mir」及「二零一八年國際足協世界盃」,推動當地電子支付高速發展。根據俄羅斯銀行數據、截至二零一八年十月全國的電子支付終端高達2,465,898台,較二零一七年全年2,189,060台上升12.6%。本集團的移動終端於二零一八年世界盃期間在支付層面上起了重要的作用,在比賽體育館場內外為球迷提供便利的無現金支付。

We have employed a bottom-up approach for identification, assessment and mitigation of risk at all business unit levels and across all functional areas.

Process used to identify, evaluate and manage significant risks

During the process of risk assessment, the Audit Committee identifies the risk of the Group and deciding on the risk levels and the Board shall assess and determine the nature and extent of the risks that are acceptable to the Group when achieving its strategic objectives. Taking into consideration the risk response, i.e. the necessary risk mitigating measures, the relevant departments and business units shall be assigned to implement the risk management solutions in accordance with their respective roles and responsibilities. The identified risk together with the risk response will be recorded at the risk register and subject to the Board's oversight.

The key elements of the risk management and internal control systems of the Company include the establishment of a risk register to keep track of and record identified risks, the assessment and evaluation of risks, the development and continuous updating of responsive procedures, and the ongoing testing of internal control procedures to ensure their effectiveness.

An ongoing risk assessment approach is adopted by the Company for identifying and assessing the key inherent risks that affect the achievement of its objectives. The judgement of the risk is mainly determined in accordance with the likelihood of occurrence and consequence of occurrence of the risk, which can be categorised into 3 classes, classifying the degree of risk impact as: Minor (1), Moderate (2) and Significant (3), and the probability of occurrence of risk as: Unlikely (1), Possible (2) and Likely (3). The risk degrees reflect the level of management's attention and risk treatment effort required.

ENVIRONMENTAL POLICIES AND PERFORMANCE

The Group values the importance of protecting the environment in the process of operation. As the Group's business does not involve production lines, major wastes comprise terminal machines and tools to be disposed of post customer consumption. To mitigate the adverse impact on the environment, waste machines and tools are transferred to government-recognised recycling companies for undergoing electronic waste recycling and decomposition. In recent years, we have also strengthened the green office concept by promoting paperless office, use of energy-saving electrical appliances such as LED light pipes and inductive faucets, wastes classification and recycling, and encouraging video conferencing in place of physical business trips to reduce energy consumption and carbon footprint.

COMPLIANCE WITH RELEVANT LAWS AND REGULATIONS

The Group seeks to uphold high standard of integrity in all aspects of business and is committed to ensure that its affairs are conducted in accordance with applicable laws and regulatory requirements and has formulated and adopted various internal control measures, approval procedures and training within all business units at all levels of the Group. CONNECTED TRANSACTIONS

During the year ended 31 December 2018, the Group entered into certain continuing connected transactions and details of these continuing connected transactions are set out below:

Framework agreements with Hi Sun

Hi Sun is a substantial shareholder interested in 33.09% of the Company's issued share capital and therefore a connected person of the Company under the Listing Rules. Accordingly, transactions between the Company and Hi Sun constitute connected transactions of the Company under the Listing Rules.

i. Supply of E-payment Terminals Products

On 31 December 2015, the Company entered into a framework agreement (the "2016 Framework Agreement") with Hi Sun, pursuant to which the Group agreed to sell and Hi Sun (together with its subsidiaries the "Hi Sun Group") agreed to purchase the E-payment Terminals Products for the mobile and other payment solutions, services and/or platforms of the Hi Sun Group. The term of the 2016 Framework Agreement commenced on 22 January 2016, the date on which relevant approval of the independent shareholders was obtained at the Company's special general meeting, and expired on 31 December 2018. The annual caps of the total contract value for the sale and purchase of E-payment Terminals products under the 2016 Framework Agreement for the three years ending 31 December 2016, 31 December 2017 and 31 December 2018 were set at HK\$300,000,000, HK\$350,000,000 and HK\$400,000,000 respectively and the actual aggregate contract value for the sale and purchase of E-Payment Terminals Products for the three years ended 31 December 2016, 31 December 2017 and 31 December 2018 were HK\$134,889,000, HK\$135,774,000 and HK\$194,221,000 respectively.

As the sale and purchase of the E-payment Terminals Products could potentially secure market share and maintain the Group's market position in the PRC, the Company entered into another framework agreement (the "2019 Framework Agreement") with Hi Sun on 5 December 2018, pursuant to which the Group agreed to sell and Hi Sun agreed to purchase the E-payment Terminals Products. The term of the 2019 Framework Agreement commenced on 1 January 2019 and will expire on 31 December 2021. The annual caps of the total contract value for the sale and purchase of E-payment Terminals Products under the 2019 Framework Agreement for each of the three years ending 31 December 2019, 31 December 2020 and 31 December 2021 were set at HK\$170,000,000

關連交易

於截至二零一八年十二月三十一日止年度,本 集團訂立若干持續關連交易,該等持續關連交 易詳情載列如下:

與高陽訂立框架協議

高陽為持有本公司已發行股本33.09%權益的主要股東,故根據上市規則,其為本公司的關連人士。因此,本公司與高陽的交易根據上市規則項下構成本公司的關連交易。

i. 供應電子支付終端產品

於二零一五年十二月三十一日,本公司與 高陽訂立一份框架協議(「二零一六年框 架協議」),據此,本集團同意出售而高陽 (連同其附屬公司,統稱「高陽集團」)同意 購買用於高陽集團的移動及其他支付解決 方案、服務及/或平台的電子轉賬銷售點 產品(「電子支付終端產品」)。二零一六 年框架協議期限於二零一六年一月二十二 日(即獲得本公司獨立股東於股東特別大 會上作出相關批准的日期開始,並已於二 零一八年十二月三十一日屆滿。根據二零 一六年框架協議,截至二零一六年十二月 三十一日、二零一七年十二月三十一日及 二零一八年十二月三十一日止三個年度, 買賣電子支付終端產品的合約總額年度上 限分別為300.000.000港元、350.000.000 港元及400,000,000港元,而截至二零 一六年十二月三十一日、二零一七年十二 月三十一日及二零一八年十二月三十一日 止三個年度買賣電子支付終端產品的實 際合約價值分別約為134,889,000港元、 135,774,000港元及194,221,000港元。

During the year, the Group has followed the internal control measures and policies in determining the prices and terms of the sale of E-payment Terminals Products to Hi Sun Group and all sales to Hi Sun Group under the 2016 Framework Agreement were on terms no less favourable to the Group than those offered to independent third parties for products of comparable quality, quantity and specifications. The Company has complied with applicable reporting, announcement, independent shareholders' approval and annual review requirements under Chapter 14A of the Listing Rules.

ii. Purchase of Chips

On 30 December 2016, the Group entered into a framework agreement (the "2017 Chips Framework Agreement") with Hi Sun, pursuant to which the Group agreed to purchase and the Hi Sun Group agreed to sell the mag-stripe card security decoder chips (the "Security Decoder Chips"), the security micro controller unit chips (the "Security Micro Controller Unit Chips") and the contactless reader chips (the "Contactless Reader Chips", collectively with the Security Decoder Chips and Security Micro Controller Unit Chips, the "Chips"). The 2017 Chips Framework Agreement commenced on 1 January 2017 and will expire on 31 December 2019.

The Board considered that the entering into of the 2017 Chips Framework Agreement would ensure continuous and stable supply of the Chips for production of the Group's E-Payment Terminals related products and reduce the production cost by saving the operational cost in sourcing suitable market suppliers, as the Chips supplied by the Hi Sun Group were fit for the production needs of the Group and with specifications not commonly supplied by other market suppliers.

The annual caps of the total contract value for the sale and purchase of Chips contemplated under the 2017 Chips Framework Agreement for the three years ending 31 December 2017, 31 December 2018 and 31 December 2019 were set at HK\$65,000,000, HK\$70,000,000 and HK\$75,000,000 respectively, and the actual aggregate contract value for the sale and purchase of Chips for the two years ended 31 December 2017 and 31 December 2018 were HK\$59,966,000 and HK\$67,587,000 respectively.

年內,本集團於釐定向高陽集團銷售電子支付終端產品的價格及條款時一直遵循內部監控措施及政策,且根據二零一六年框架協議向高陽集團的所有銷售條款對可不遜於向獨立第三方提供可比較質素、數量和規格之產品的條款。本公司已遵守上市規則第14A章適用之申報、公告及年度審核的規定,及獲豁免遵守獨立股東批准的規定。

ii. 購買芯片

董事會認為,訂立二零一七年芯片框架協議可確保本集團生產電子支付終端相關產品所用芯片獲得持續及穩定之供應,並可透過減省物色合適市場供應商之經營成本從而降低生產成本,因高陽集團供應之芯片切合本集團之生產需要,而其規格於其他市場供應商並不常見。

根據二零一七年芯片框架協議,截至二零一七年十二月三十一日、二零一八年十二月三十一日及二零一九年十二月三十一日止三個年度,買賣芯片之總合約值年度上限分別為65,000,000港元、70,000,000港元及75,000,000港元,而截至二零一七年十二月三十一日及二零一八年十二月三十一日止兩個年度買賣芯片的實際合約價值分別合共為59,966,000港元及67,587,000港元。

During the year, the prices payable for the purchase of the Chips under the 2017 Chips Framework Agreement were determined by making reference to the prices of other products sold by Hi Sun Group and the prices of similar products sold by third party suppliers in the industry. The Company has also complied with applicable reporting, announcement and annual review requirements and is exempt from the independent shareholders' approval requirements under Chapter 14A of the Listing Rules.

Please also refer to Note 34 to the consolidated financial statements.

The Board including the independent non-executive Directors has reviewed the above continuing connected transactions and confirmed that these transactions entered into by the Company:

- (i) in the ordinary and usual course of business of the Group;
- (ii) on normal commercial terms or better; and
- (iii) according to the agreements governing them on terms that are fair and reasonable and in the interests of the shareholders of the Company as a whole.

The Company's auditor was engaged to report on the Group's continuing connected transactions for the year ended 31 December 2018 in accordance with Hong Kong Standard on Assurance Engagements 3000 (Revised) "Assurance Engagement Other Than Audits or Reviews of Historical Financial Information" and with reference to Practice Note 740 "Auditor's Letter on Continuing Connected Transactions under the Hong Kong Listing Rules" issued by the Hong Kong Institute of Certified Public Accountants. The Board confirms that the auditor has issued an unqualified letter confirming the matters in accordance with Rule 14A.56 of the Listing Rules in respect of the Group's continuing connected transactions for the year ended 31 December 2018 as being in order. Copy of this letter has been provided to the Stock Exchange.

A summary of significant related party transactions made during the year was disclosed in Note 34 to the financial statements.

年內,根據二零一七年芯片框架協議購買芯片的應付價格乃參考高陽集團出售其他產品的價格及第三方供應商於業內出售同類產品的價格而釐定。本公司亦已遵守上市規則第14A章適用之申報、公告及年度審閱的規定,及獲豁免遵守獨立股東批准的規定。

亦請參閱綜合財務報表附註34。

董事會(包括獨立非執行董事)已審閱上述持續關連交易,並確認本公司訂立的該等交易為:

- (i) 於本集團一般日常業務中訂立;
- (ii) 按一般商業條款或更佳條款訂立;及
- (iii) 根據有關交易的協議進行,條款公平合理,並且符合本公司股東整體利益。

年內進行的重大關聯交易概要於財務報表附註 34披露。

我們在審計中識別的關鍵審計事項概述如下:

- 應收款項減值
- 存貨撥備

獨立核數師報告

Key Audit Matter 關鍵審計事項 How our audit addressed the Key Audit Matter 我們的審計如何處理關鍵審計事項

Impairment of receivables 應收款項的減值

Refer to Note 3.1(b)(ii) (financial risk factors), Note 4(c) (critical accounting estimates and judgements) and Note 21 (trade and bills receivables and other financial assets at amortised cost) to the consolidated financial statements for related disclosures

有關相關事項的披露,請參閱綜合財務報表附註3.1(b)(ii) (財務風險因素)、附註4(c)(關鍵會計估計及判斷)及附註 21(應收賬款及應收票據及按攤銷成本列賬的其他金融資 產)

As at 31 December 2018, the Group had gross trade receivables of HK\$1,982.7 million and provision for impairment of trade receivables of HK\$84.2 million. Provision is made for lifetime expected credit losses on trade receivables.

於二零一八年十二月三十一日, 貴集團的應收賬款總額為1,982.7百萬港元,應收賬款減值撥備約為84.2百萬港元。 貴集團就應收賬款的全期預期信貸虧損計提撥備。

Management applied judgement in assessing the expected credit losses. Receivables relating to customers with known financial difficulties or significant doubt on collection of receivables are assessed individually for provision for impairment allowance. Expected credit losses are also estimated by grouping the remaining receivables based on shared credit risk characteristics and collectively assessed for likelihood of recovery, taking into account the nature of the customer, its geographical location and its ageing category, and applying expected credit loss rates to the respective gross carrying amounts of the receivables. The expected credit loss rates are determined based on historical credit losses experienced from the past 3 years and are adjusted to reflect current and forward-looking information such as macroeconomic factors affecting the ability of the customers to settle the receivables.

管理層運用判斷評估預期信貸虧損。對於已知存在財務困難的客戶或回收性存在重大疑問的應收款項會就計提減值撥備時作出個別評估。在估計預期信貸虧損時,其餘的應收款項亦會根據客戶性質、地理位置以及賬齡組別按照其分佔信貸風險特徵進行分類,以共同評估其可回收性,並應用預期信貸虧損率於相關應收款項的賬面總額。預期信貸虧損率乃根據過往三年出現的歷史信貸虧損釐定,並經調整以反映現時及前瞻性資料,例如有關影響客戶償付應收款項能力的宏觀經濟因素。

We focused on this area due to the magnitude of the trade receivables and the estimation and judgement involved in determining the expected credit losses allowance of the trade receivables.

我們關注此範疇是鑑於應收賬款的重大數額,以及在釐定 應收賬款預期信貸虧損準備時涉及估計和判斷。 Our audit procedures in relation to management's assessment on provision for impairment losses of trade receivables included:

我們對有關管理層評估應收賬款減值虧損撥備之審計程序包括:

- Understood and validated the credit control procedures performed by management, including its procedures on periodic review of aged receivables and assessment on expected credit losses allowance of receivables;
- 理解和驗證管理層執行的信用監控程序,包括其對定期 審閱逾期應收款項及評估應收款項預期信貸虧損準備的 程序;
- Tested on a sample basis, the accuracy of ageing profile of trade receivables by checking to the underlying sales invoices;
- 透過檢查相關銷售發票,以抽樣方式測試應收賬款賬齡 之準確性;
- Tested on a sample basis, the subsequent settlement of trade receivables against bank receipts; and
- 以抽樣方式對照銀行收據測試應收賬款於結算日後的償付情況;及
- Obtained management's assessment on the expected credit losses allowance of receivables. We corroborated and validated management's assessment based on the historical settlement pattern from the past 3 years, correspondence with the customers, evidence from external sources including the relevant public search results relating to the financial circumstances of the relevant customers and market research regarding the relevant forward-looking information such as macroeconomic factors used in management's assessment.
- 取得管理層對應收款項預期信貸虧損準備的評估。我們基於過往三年償付模式、與客戶的通訊及來自外部來源的證據(包括有關客戶的財務狀況的相關公開搜索結果)以及有關前瞻性資料的市場研究,證實並驗證管理層的評估,例如管理層評估中的宏觀經濟因素等信息。

Based upon the above, we found that the estimation and judgement made by management in respect of the expected credit losses allowance and the collectability of receivables were supportable by the available evidence.

基於上述各項,我們發現管理層就應收款項預期信貸虧損準備及可收回性所作的估計及判斷有可得的證據支持。

Provision for inventories 存貨撥備

Refer to Note 4(b) (critical accounting estimates and judgements) and Note 20 (inventories) to the consolidated financial statements for the related disclosures

有關相關事項的披露,請參閱綜合財務報表附註4(b)(關鍵會計估計及判斷)及附註20(存貨)。

The Group held inventories of HK\$1,182.0 million as at 31 December 2018. Inventories are carried at the lower of cost and net realisable value ("NRV"). The cost of inventories may not be recoverable if those inventories are aged and damaged, if they have become obsolete, or if their selling prices have declined. For the year ended 31 December 2018, the Group has made provision for inventories of HK\$43.1 million.

貴集團於二零一八年十二月三十一日持有存貨約1,182.0 百萬港元。存貨乃按成本與可變現淨值(「可變現淨值」)之 較低者列賬。倘存貨已經陳舊、損壞、過時或售價下跌,則 可能無法收回存貨成本。截至二零一八年十二月三十一日 止年度, 貴集團計提存貨撥備約43.1百萬港元。

Management determines the lower of cost and NRV of inventories by considering the ageing profile, inventory obsolescence and estimated selling price of individual inventory items.

管理層釐定存貨成本及可變現淨值之較低者時,會考慮個 別存貨的庫齡、存貨是否過時和個別存貨的預測售價。 Our audit procedures in relation to management's assessment on NRV and obsolescence of inventories included:

我們對有關管理層評估存貨之可變現淨值及其是否過時執行 的審計程序包括:

- Understood and validated the control procedures performed by management, including its procedures in estimating the NRV of the inventories and conducting periodic review of inventory obsolescence;
- 理解和驗證管理層執行的監控程序,包括其估計存貨可 變現淨值及定期覆核存貨過時的程序;
- Observed client's inventory counts to identify whether there is any damaged or obsolete inventory;
- 一 對存貨進行監盤,以識別出有否有任何損壞或過時存貨;
- Tested on a sample basis, the accuracy of the ageing profile of individual inventory items by checking to the underlying procurement correspondence and invoices;
- 透過檢查相關採購資料及發票,以抽樣方式測試個別存 貨項目庫齡之準確性;

Key Audit Matter 關鍵審計事項

Management calculates the NRV at each period end based on the estimated selling price less selling expenses, which requires significant judgements and assumptions to be made to determine the estimated selling price of individual product, including historical experience of selling products of similar nature and expectation of future sales based on current market conditions.

管理層以其預測售價減去出售開支來計算各期末的可變現 淨值,在釐定個別產品之預測售價時須作出重大判斷及假 設,包括考慮以往出售類似性質產品的經驗以及按現有市 況對未來銷售作出之預測。

Management consistently applies a provisioning methodology for slow moving inventories based on inventory ageing and makes specific provision for long aged inventories. Management also conducted periodic review on inventory obsolescence, including performance of periodic inventory counts and review of holding period for individual inventory items.

管理層按存貨年期對滯銷存貨貫徹地應用撥備方法,並就 長期陳舊存貨作出特定撥備。管理層亦會就存貨是否過時 進行定期審查,包括定期進行存貨盤點及審閱個別存貨項 目的持有期。

We focused on this area due to the estimation of provision for inventories involves significant judgement and various uncertainties as a result of changing technology, customer demand and competitors actions.

我們關注此範疇是鑑於對存貨的撥備估計涉及重大判斷, 以及技術日新月異、客戶需求及競爭者之行為導致多種不 明朗因素。

How our audit addressed the Key Audit Matter 我們的審計如何處理關鍵審計事項

- Tested on a sample basis, the subsequent usage of significant inventory items, obtained through the usage report subsequent to the year end as a basis to identify inventory obsolescence. Where there are no subsequent usage of the respective items after the year end, we discussed with management its assessment on estimated future utilisation, corroborating explanations with the inventory ageing, sales orders and marketability of the relevant finished goods by using our industry knowledge and external market analysis, as appropriate; and
- 以抽樣方式測試重要存貨於年末後之使用情況,透過取得年末後的使用報告,識別出過時存貨。倘相關存貨於年末後並無用量,我們會與管理層討論其對估計存貨未來使用率作出之評估,透過我們對行業的認識和外部市場分析(如適用),佐證有關存貨庫齡、銷售訂單及相關製成品營銷能力的解釋;及
- Tested on a sample basis, the NRV of selected inventory items, by comparing the selling price subsequent to the year end, against the carrying values of these individual finished goods. Where there are no subsequent sales of the respective finished goods after the year end, we discussed with management as to the realisable value of the products, corroborating explanations with the inventory ageing, sales orders, historical margins, and current market conditions by using our industry knowledge and external market analysis, as appropriate.
- 以抽樣方式測試選定存貨項目之可變現淨值,在測試中將個別製成品於年末後的售價與其賬面值作一比較。對於年末後並無出售的相關製成品,我們已與管理層討論該產品的可變現值,並透過我們對行業的認識和外部市場分析(如適用),佐證有關存貨年期、銷售訂單、過往毛利率及現行市況的解釋。

Based on the procedures described, we found the estimations of management in relation to the provision for inventories were supportable by available evidence.

根據所述程序·我們發現管理層有關存貨撥備之估計有可得的證據支持。

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, in accordance with Section 90 of the Companies Act 1981 of Bermuda and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

 consolidated financial statements, whether due to fraud or error,
 design and perform audit procedures responsive to those risks,
 and obtain audit evidence that is sufficient and appropriate to
 provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting
 from error, as fraud may involve collusion, forgery, intentional
 omissions, misrepresentations, or the override of internal control.

From the matters communicated with the audit committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

從與審核委員會溝通的事項中,我們確定哪些事項對本期綜合財務報表的審計最為重要,因而構成關鍵審計事項。我們在核數師報告中描述這些事項,除非法律法規不允許公開披露這些事項,或在極端罕見的情況下,如果合理預期在我們報告中溝通某事項造成的負面後果超過產生的公眾利益,我們決定不應在報告中溝通該事項。

The engagement partner on the audit resulting in this independent auditor's report is Chan Tak Wai, Daniel.

(a) New and amended standards adopted by the Group (continued)

The adoption of HKFRS 15 did not have any material impact on the Group's consolidated financial statements.

HKFRS 9 replaces the provisions of HKAS 39 that relate to the recognition, classification and measurement of financial assets and financial liabilities, derecognition of financial instruments, impairment of financial assets and hedge accounting.

The adoption of HKFRS 9 from 1 January 2018 resulted in changes in accounting policies and adjustments to the amounts recognised in the consolidated financial statements as described below. In accordance with the transitional provisions in HKFRS 9, HKFRS 9 was generally adopted without restating comparative information. The reclassifications and the adjustments arising from the new impairment rules are therefore not reflected in the restated consolidated balance sheet as at 31 December 2017, but are recognised in the opening consolidated balance sheet on 1 January 2018.

The Group elected to present change in the fair value of its equity investment (previously classified as AFS) in other comprehensive income as it is a long-term and strategic investment that is not expected to be sold in the short to medium term. As a result, the AFS with fair value of HK\$19,139,000 as at 1 January 2018 was reclassified to financial asset at FVOCI and the related cumulative fair value loss of HK\$553,000 was reclassified from available-for-sale revaluation reserve to financial asset at FVOCI reserve on 1 January 2018.

The unlisted investment fund of the Group with fair value of HK\$55,378,000 as at 1 January 2018 was reclassified from AFS to financial asset at FVPL. It does not meet the HKFRS 9 criteria for classification at amortised cost and FVOCI, as its cash flows do not represent solely payments of principal and interest and the unlisted investment fund has a definite life.

Related cumulative fair value loss of HK\$5,592,000 were transferred from the available-for-sale revaluation reserve to retained earnings on 1 January 2018. During the year ended 31 December 2018, fair value gain of HK\$2,888,000 relating to the investment was recognised in the consolidated income statement.

There is no impact on the Group's accounting for financial liabilities, as the new requirements only affect the accounting for financial liabilities that are designated at FVPL and the Group does not have any such liabilities.

The Group was required to revise its impairment methodology under HKFRS 9 for each of these classes of assets.

While restricted cash, short-term bank deposits and cash and cash equivalents are also subject to the impairment requirements of HKFRS 9, the identified impairment loss was immaterial.

Trade and bills receivables

The Group applies the simplified approach to provide for expected credit losses prescribed by HKFRS 9, which permits the use of the lifetime expected losses for all trade and bills receivables. To measure the expected credit losses, receivables relating to customers with known financial difficulties or significant doubt on collection of receivables are assessed individually for provision for impairment allowance.

Expected credit losses are also estimated by grouping the remaining receivables based on shared credit risk characteristics and collectively assessed for likelihood of recovery, taking into account the nature of the customer, its geographical location and its ageing category, and applying expected credit loss rates to the respective gross carrying amounts of the receivables.

The expected credit loss rates are determined based on historical credit losses experienced from the past 3 years and are adjusted to reflect current and forward-looking information such as macroeconomic factors affecting the ability of the customers to settle the receivables.

Management has closely monitored the credit qualities and the collectability of the trade and bills receivables. The adoption of the simplified expected credit loss approach under HKFRS 9 has not resulted in any additional impairment loss for trade and bills receivables as at 1 January 2018.

HKFRS 16 Leases

HKFRS 16 was issued in January 2016. It will result in almost all leases being recognised on the consolidated balance sheet by lessees, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. The only exceptions are short-term and low-value leases.

The accounting for lessors will not significantly change.

The standard will affect primarily the accounting for Group's operating leases. As at the reporting date, the Group has non-cancellable operating lease commitments of HK\$35,986,000, see Note 33. However, the Group has not yet determined to what extent these commitments will result in the recognition of an asset and a liability for future payments and how this will affect the Group's profit and classification of cash flows.

Some of the commitments may be covered by the exception for short-term and low value leases and some commitments may relate to arrangements that will not qualify as leases under HKFRS 16.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 Principles of consolidation and equity accounting

(i) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated income statement, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated balance sheet respectively.

(ii) Associated companies

Associated companies are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associated companies are accounted for using the equity method of accounting (see (iii) below), after initially being recognised at cost.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 Principles of consolidation and equity accounting (continued)

(iii) Equity accounting

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in the consolidated income statement, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividend received or receivable from associated companies are recognised as a reduction in the carrying amount of the investment.

When the Group's share of losses in an equityaccounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the Group and its associated company are eliminated to the extent of the Group's interest in this entity. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

The carrying amount of equity-accounted investment is tested for impairment in accordance with the policy described in Note 2.10.

以權益法入賬的投資的賬面值 根據附註2.10所述政策進行減 值測試。

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 Principles of consolidation and equity accounting (continued)

(iv) Changes in ownership interests

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of the Company.

When the Group ceases to consolidate or equity account for an investment because of a loss of control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognised in the consolidated income statement. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associated company, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable HKFRSs.

If the ownership interest in an associated company is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

倘減少聯營公司的擁有權權益 但仍保留重大影響,則僅會將 先前於其他全面收益確認的金 額中按比例計算的份額重新分 類至損益(倘適用)。

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.3 Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- fair values of the assets transferred
- liabilities incurred to the former owners of the acquired business
- equity interests issued by the Group
- fair value of any asset or liability resulting from a contingent consideration arrangement, and
- fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Acquisition-related costs are expensed as incurred.

The excess of the

- consideration transferred,
- amount of any non-controlling interest in the acquired entity, and
- acquisition-date fair value of any previous equity interest in the acquired entity

over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognised directly in the consolidated income statement as a bargain purchase.

2.3 Business combinations (continued)

Contingent consideration payable is classified either as equity or financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in the consolidated income statement.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in the consolidated income statement.

2.4 Separate financial statements

Investments in subsidiaries are accounted for at cost less impairment. Cost includes direct attributable costs of an investment. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

Impairment testing of the investments in subsidiaries is required upon receiving a dividend from these investment if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

2.6 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates or the currency in which funds from financing activities are generated (the "functional currency"). The consolidated financial statements are presented in Hong Kong dollars ("HK\$"), which is the Company's functional and the Group's presentation currency.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement.

Foreign exchange gains and losses that relate to borrowings are presented in the consolidated income statement, within "finance costs". All other foreign exchange gains and losses are presented in the consolidated income statement on a net basis within "administrative expenses".

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair values are reported as part of the fair value gain or loss. For example, translation differences on non-monetary financial assets and liabilities such as equities held at FVPL are recognised in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as financial assets at FVOCI are recognised in other comprehensive income.

(c) Group companies

The results and financial position of foreign operations (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (i) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet:
- (ii) income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
- (iii) all resulting currency translation differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to the consolidated income statement, as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Currency translation differences arising are recognised in other comprehensive income.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Property, plant and equipment

Except for the freehold land with indefinite useful life, all other property, plant and equipment are stated at historical cost less depreciation and impairment losses. Freehold land with indefinite life is stated at historical cost less impairment loss. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the consolidated income statement during the financial period in which they are incurred.

Depreciation of property, plant and equipment is calculated using the straight-line method to allocate cost to their residual values over their estimated useful lives, as follows:

Buildings 5% – 10%

Leasehold improvements 20% or over lease terms,

whichever is shorter

Office furniture and equipment 18% – 25%

Plant and equipment 9% – 33%

Motor vehicles 18% – 25%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within "administrative expenses" in the consolidated income statement.

廠房及設備 9% - 33%

資產的剩餘價值及可用年期會於各報告期末審閱及調整(如適用)。倘資產的賬面值超過其估計可收回金額,則其賬面值將即時撇減至其可收回金額。

出售資產的收益及虧損指出售所得款 項與有關資產賬面值之間差額,並於 綜合收益表的「行政開支」內確認。

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.7 Property, plant and equipment (continued)

Construction in progress represents property, plant and equipment under construction or pending installation, and is stated at cost less impairment losses. Cost comprises direct costs of construction including borrowing costs attributable to the construction during the period of construction. No provision for depreciation is made on construction in progress until such time as the relevant assets are completed and ready for intended use.

2.8 Intangible assets

(a) Goodwill

Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes and not larger than an operating segment.

(b) Brand names, contractual customer relationships and others

Brand names, contractual customer relationships and others acquired in a business combination are recognised at fair values at the acquisition date. These intangible assets have a finite useful life and are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method over their expected lives from 5 to 10 years to allocate the cost of them.

2.9 Land use rights

Land use rights are stated at cost less accumulated amortisation and impairment losses. Cost represents upfront prepayments made for the rights to use the land for periods varying from 10 to 50 years. Amortisation of land use rights is charged to the consolidated income statement on a straight-line basis over the period of the lease or when there is impairment, the impairment is charged to the consolidated income statement.

2.10 Impairment of non-financial assets

Goodwill not subject to amortisation is tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

2.10 非金融資產的減值

商譽每年進行減值測試,或倘有事件 或情況變動表明其可能出現減值,則 會更頻繁地進行減值測試。須攤銷的 資產須於未必可收回賬面值的事件 或變動發生時檢討是否出現減值。減 值虧損為資產賬面值超越其可收回 價值的數額。可收回金額為資產公平 值減處置成本後的價值,與其使用價 值之間的較高者。就評估資產減值而 言,本集團按個別可識別現金流入, 其很大程度獨立的現金流入來自其他 資產或資產組合(現金產生單位)的 最低水平劃分資產類別。除商譽外, 已蒙受減值的非金融資產在各報告 期間均就減值是否可以撥回進行檢 計。

2.11 Investments and other financial assets

2.11.1Classification

From 1 January 2018, the Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those to be measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at FVOCI.

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

2.11.2 Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

2.11.1 分類

自二零一八年一月一日起,本 集團將其金融資產分類為下列 計量類別:

- 隨後按公平值計量的金融資產(透過其他全面收益,或透過損益呈列),及
- 按攤銷成本計量的金融資 產。

分類取決於實體管理金融資產 之業務模式及現金流之合約條 款。

就按公平值計量之資產而言, 其收益及虧損將於損益或其 全面收益列賬。就未持作實 的權益工具投資而言,此將 決於本集團是否不可撤銷地 擇於初始確認時列作按公權 計入其他全面收益呈列的權益 投資。

2.11.3 Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial asset carried at FVPL are expensed in the consolidated income statement.

• Debt instruments

Subsequent measurement of debt instruments depends on the Group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories to classify the debt instruments:

(1) Amortised cost

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in the consolidated income statement. Impairment losses are presented as separate line item in the consolidated income statement.

• 債務工具

債務工具之後續計量取決 於本集團管理資產之業務 模式及該等資產之現金流 量特徵。債務工具可分為 三種計量類別:

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through other comprehensive income, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in the consolidated income statement. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss. Interest income from these financial assets is included in finance income using the effective interest rate method. Impairment expenses are presented as separate line item in the consolidated income statement.

(3) Fair value through profit or loss

Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in the consolidated income statement in the period in which it arises.

2.11.3 Measurement (continued)

• Equity instruments

The Group subsequently measures all equity investments at fair values. Where the Group's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in the consolidated income statement as "other gains" when the Group's right to receive payments is established.

Changes in the fair value of financial asset at FVPL are recognised in "other gains" in the consolidated income statement as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

2.11.4 Impairment

From 1 January 2018, the Group assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade and bills receivables, the Group applies the simplified approach permitted by HKFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

2.11.5 Accounting policies applied until 31 December 2017

The Group has applied HKFRS 9 retrospectively, but has elected not to restate comparative information. As a result, the comparative information provided continues to be accounted for in accordance with the Group's previous accounting policy.

Until 31 December 2017, the Group classifies its financial assets in loans and receivables, and AFS. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Reclassification

Reclassifications were made at fair value as of the reclassification date. Fair value became the new cost or amortised cost as applicable, and no reversals of fair value gains or losses recorded before reclassification date were subsequently made.

• Subsequent measurement

The measurement at initial recognition did not change on adoption of HKFRS 9, see description above. AFS is subsequently carried at fair values. Loans and receivables are subsequently carried at amortised cost using the effective interest method. Changes in the fair values of monetary and non-monetary securities classified as AFS are recognised in other comprehensive income.

When securities classified as AFS are sold or impaired, the accumulated fair value adjustments recognised in equity are included in the consolidated income statement.

2.11.5 Accounting policies applied until 31

December 2017 (continued)

• Impairment

The Group assesses at each of the balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator that the assets are impaired.

Assets carried at amortised cost

For loans and receivables category, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in the consolidated income statement.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in the consolidated income statement.

Assets classified as available-for-sale

If there is objective evidence of impairment for AFS, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the consolidated income statement – is removed from equity and recognised in the consolidated income statement. Impairment losses on equity instruments that were recognised in consolidated income statement are not reversed through the consolidated income statement in a subsequent period.

2.12 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the consolidated balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

2.13 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average method. The cost of finished goods and work in progress comprises raw materials, direct labour cost and related production overheads (based on normal operating capacity). Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

2.14 Trade and bills receivables

Trade and bills receivables including retention money receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection of trade and bills receivables is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognised at fair value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method less provision for impairment.

When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against "net impairment losses on financial assets" in the consolidated income statement.

2.15 Cash and cash equivalents

In the consolidated cash flow statement, cash and cash equivalents include cash on hand and deposits held at call with banks, with original maturities of three months or less.

2.16 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

2.13 存貨

存貨乃以成本值及可變現淨值兩者中較低者列賬。成本以加權平均法釐定。製成品及在製品的成本包括原材料、直接人工成本及有關生產經常開支(按正常營運能力計算)。可變現淨值為正常業務過程中的估計售價扣除適用的可變銷售開支。

2.14 應收賬款及應收票據

應收賬款及應收票據(包括應收預扣金額)為於正常業務過程中就出售商品或履行服務而應收客戶的款項。倘應收賬款及應收票據預期於一年內(或如屬較長時間,則於一般營運業務週期)收回,則分類為流動資產。否則,呈列為非流動資產。

應收賬款初步按無條件代價金額確認,除非其包含重大融資部分,則按公平值確認。本集團持有應收賬款之目的為收取合約現金流量,因此其後採用實際利息法按攤銷成本減去減值撥備計量。

當應收賬款不可收回時,該金額在應收賬款撥備賬中撇銷。其後收回早前 撇銷的金額則撥回扣除綜合收益表 中的「金融資產之減值淨虧損」。

2.15 現金及現金等價物

於綜合現金流量表,現金及現金等價物包括手上現金及期限為三個月以下之銀行活期存款。

2.16 股本

普通股分類為權益。直接歸屬於發行新股份或購股權的新增成本於權益中呈列為所得款項的減少(扣除稅項)。

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.17 Trade, bills and other payables

Trade and bills payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Payables are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade, bills and other payables are recognised initially at fair values and subsequently measured at amortised cost using the effective interest method

2.18 Borrowings

Borrowings are initially recognised at fair values, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the consolidated income statement over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the consolidated balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in the consolidated income statement as "other income" or "finance costs".

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.19 Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(a) Current income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(b) Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted at the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in foreign operations where the Group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

2.20 Employee benefits

(a) Employee leave entitlements

Employee entitlements to annual leave are recognised when they accrue to employees. A provision, where appropriate, is made for the estimated liability for annual leave as a result of services rendered by employees up to the balance sheet date.

Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

(b) Post employment pension obligations

The Group operates various post-employment schemes, including both defined benefit and defined contribution pension plans.

The liability or asset recognised in the consolidated balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating to the terms of the related obligation. In countries where there is no deep market in such bonds, the market rates on government bonds are used.

2.21 Share-based payments

(a) Equity-settled share based payment transactions

The Group operates an equity-settled share-based compensation plan, under which the entity receives services from employees as consideration for equity instruments (options) of the Group. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense. The total amount to be expensed is determined by reference to the fair value of the options granted:

- including any market performance conditions;
- excluding the impact of any service and nonmarket performance vesting conditions (for example, remaining an employee of the entity over a specified time period); and
- including the impact of any non-vesting conditions.

The total expense is recognised over the vesting period which is the period over which all of the specified vesting conditions are to be satisfied.

At the end of each reporting period, the Group revises its estimates of the number of options that are expected to vest based on the non-marketing performance and service conditions. It recognises the impact of the revision to original estimates, if any, in the consolidated income statement, with a corresponding adjustment to equity.

When the options are exercised, the Company issues new shares. The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium.

2.21 Share-based payments(continued)

(b) Share-based payment transactions among group entities

The grant by the Company of options over its equity instruments to the employees of subsidiaries undertakings in the Group is treated as a capital contribution. The fair value of employee services received, measured by reference to the grant date fair value, is recognised over the vesting period as an increase to investment in subsidiary undertakings, with a corresponding credit to equity in the parent entity accounts.

2.22 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

3 FINANCIAL RISK MANAGEMENT

3.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

(a) Market risk

(i) Foreign exchange risk

The Group's foreign currency transactions are mainly denominated in Renminbi ("RMB"), HK\$, United States dollar ("US\$") and European dollar ("EUR"). The majority of assets and liabilities are denominated in RMB, HK\$, US\$ and EUR and there are no significant assets and liabilities denominated in other currencies. The Group is subject to foreign exchange rate risk arising from future commercial transactions and recognised assets and liabilities denominating in a currency other than HK\$, RMB, US\$ or EUR, which are the functional currencies of the major operating companies within the Group. The Group currently does not hedge its foreign currency exposure.

The management considers the foreign exchange risk with respect to US\$ is not significant as HK\$ is pegged to US\$ and transactions denominated in US\$ are mainly carried out by entities with the same functional currency. The exchange rate of RMB to HK\$ is subject to the rules and regulations of foreign exchange control promulgated by the PRC government. The Group manages its foreign currency risk by closely monitoring the movement of the foreign currency rates.

(b) Credit risk

Credit risk arises from trade and bills receivables, other financial assets at amortised cost, financial asset at FVPL, restricted cash, short-term bank deposits and cash and cash equivalents.

The carrying amounts of trade and bills receivables (Note 21), other financial assets at amortised cost (Note 21), financial asset at FVPL (Note 17), restricted cash (Note 23), short-term bank deposits (Note 24) and cash and cash equivalents (Note 25) represent the Group's maximum exposure to credit risk in relation to financial assets.

(i) Risk management

To manage this risk, deposits of the Group are mainly placed with state-owned financial institutions and reputable banks. The Group has policies in place to ensure that sales are made to reputable and creditworthy customers with an appropriate financial strength, credit history and an appropriate percentage of down payments. It also has other monitoring procedures to ensure that follow-up action is taken to recover overdue debts.

In addition, the Group reviews regularly the authorisation of credit limits to individual customers and recoverable amount of each individual trade receivables to ensure that adequate impairment losses are made for irrecoverable amounts.

The Group has concentration of credit risk. Sales of goods and services to the top five customers constituted 60.7% (2017: 53.5%) of the Group's revenue for the year ended 31 December 2018. They accounted for approximately 52.7% (2017: 43.6%) of the gross trade receivable balances as at 31 December 2018. Collections of outstanding receivable balances are closely monitored on an ongoing basis to minimise such credit risk.

(ii) Impairment of financial assets

Trade and bills receivables for sales of goods of the Group and from the provision of services are subject to the expected credit loss model. While cash and cash equivalents, restricted cash, shortterm bank deposits and other financial assets at amortised cost are also subject to the impairment requirements of HKFRS 9, the identified impairment loss was immaterial.

Trade and bills receivables

The Group applies the HKFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade and bills receivables. The Group measures the expected credit losses on a combination of both individual and collective basis.

Measurement of expected credit loss on collective basis (continued)

The expected credit loss rates are determined based on historical credit losses experienced from the past 3 years and are adjusted to reflect current and forward-looking information such as macroeconomic factors affecting the ability of the customers to settle the receivables.

As at 31 December 2018, the balance of loss allowance in respect of these collectively assessed trade receivable balances was HK\$1,839,000 based on expected loss rates up to 0.35% applied on different groupings (2017: up to 0.13%, which does not have a material impact to the Group's consolidated financial statements).

Impairment losses on receivables are presented as "net impairment losses on financial assets" in the consolidated income statement. When a receivable is uncollectible, it is written off against the allowance account for receivables. Subsequent recoveries of amounts previously written off are credited against the same line item.

Cash and cash equivalents, restricted cash, shortterm bank deposits and other financial assets at amortised cost

There is no loss allowance for cash and cash equivalents, restricted cash, short-term bank deposits and other financial assets at amortised cost as at 31 December 2018 (2017: same).

(ii) Impairment of financial assets (continued)

<u>Previous accounting policy for impairment of trade</u> and bills receivables

In the prior year, the impairment of trade and bills receivables was assessed based on the incurred loss model. An allowance for impairment of receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments are considered indication that the receivable is impaired.

When a trade and bills receivable is uncollectible, it is written off against the allowance account for trade and bills receivables. Subsequent recoveries of amounts previously written off are credited against "administrative expenses" in the consolidated income statement

The impact on transition to HKFRS 9 on 1 January 2018 (date of adoption of HKFRS 9) as a result of applying the expected credit risk model was immaterial.

(c) Liquidity risk

With prudent liquidity risk management, the Group aims to maintain sufficient cash and cash equivalents and ensure the availability of funding through an adequate amount of available financing, including short-term bank borrowings. Due to the dynamic nature of the underlying businesses, the Group's finance department maintains flexibility in funding by maintaining adequate amount of cash and cash equivalents and flexibility in funding through having available sources of financing.

(c) Liquidity risk (continued)

Surplus cash held by the operating entities over and above the balance required for working capital management are transferred to interest-bearing bank deposits with appropriate maturities to manage its overall liquidity position. As at 31 December 2018, the Group maintained cash and cash equivalents of approximately HK\$2,160,192,000 (2017: HK\$2,165,224,000), that are expected to be readily available and sufficient to meet the cash outflows of its financial liabilities, hence, management considers that Group's exposure to liquidity risk is not significant.

As at 31 December 2018, the Group's total available banking facilities, amounted to approximately HK\$11,900,000 (2017: HK\$18,031,000), of which approximately HK\$8,244,000 (2017: HK\$14,367,000) has been utilised.

The table below analyses the Group's non-derivative financial liabilities into relevant maturity grouping based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying values as the impact of discounting is not significant.

3.2 Capital management

The Group regards its shareholders' equity as capital. The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group monitors capital on the basis of gearing ratio. This ratio is calculated as total debt divided by total capital. Total debt includes borrowings of the Group. Total capital is calculated as "equity" as shown in the consolidated balance sheet plus total debt.

As at 31 December 2018 and 2017, the gearing ratio was as follows:

The table below analyses the Group's financial instruments carried at fair values as at 31 December 2018 and 2017 by level of valuation techniques used to measure fair values. Such inputs are categorised into three levels within a fair value hierarchy as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

3 FINANCIAL RISK MANAGEMENT (continued)

3.3 Fair value estimation (continued)

(i) Fair value hierarchy (continued)

(a) Financial instruments in Level 1

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and equity securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets is the current bid price. These instruments are included in level 1.

(b) Financial instruments in Level 2

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

(c) Financial instruments in Level 3

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for the unlisted equity investment and unlisted investment fund.

(ii) Valuation techniques used to determine fair values

The Group's finance department includes a team that performs the valuations of financial assets required for financial reporting purposes, including level 3 fair values. As part of the valuation process, this team reports directly to the chief financial officer (CFO) and external valuers will be engaged, if necessary.

In applying the discounted cash flow technique, management has taken into account the estimated amount that the Group would receive to sell the instrument at the balance sheet date, taking into account current interest rates and the current credit worthiness of the counterparties. Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate is a market related rate for a similar instrument at the balance sheet date.

綜合財務報表附註

Estimates and judgements used in preparing the consolidated financial statements are evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal to the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

(a) Income taxes and deferred taxation

Significant judgement is required in determining the provision for income tax. There are many transactions and calculations for which the ultimate determination is uncertain. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such difference will impact the current tax and deferred tax assets and liabilities in the period in which such determination is made.

Deferred tax assets relating to certain temporary differences and tax losses are recognised when management considers it is probable that future taxable profit will be available against which the temporary differences or tax losses can be utilised. The outcome of their actual utilisation may be different.

(b) Provision for inventories

Inventories are carried at the lower of cost and net realisable value. The cost of inventories is written down to net realisable value when there is an objective evidence that the cost of inventories may not be recoverable. The cost of inventories may not be recoverable if those inventories are aged and damaged, if they have become wholly or partially obsolete, or if their selling prices have declined. The cost of inventories may also not be recoverable if the estimated costs to be incurred to make the sales have increased.

The amount written off in the consolidated income statement is the difference between the carrying value and net realisable value of the inventories. In determining whether the inventories can be recoverable, significant judgement is required. In making this judgement, the Group evaluates, among other factors, the duration and extent by all means to which the amount will be recovered.

(c) Impairment of receivables

The Group makes provision for impairment of receivables based on assumptions about risk of default and expected loss rates (Note 3.1(b)(ii)). The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward–looking estimates at the balance sheet date.

4 重要會計估計及判斷

用於編製綜合財務報表的估計及判斷,乃 基於過往經驗及其他因素,包括預期日後 在有關情況下相信會合理出現的事件而作 出。

本集團作出有關未來的估計及假設。按此 規範,所作的會計估計甚少與有關的實際 結果相同。下文載列有極大風險會導致須 對下一個財政年度資產與負債的賬面值作 出重大調整的估計及假設。

(a) 所得税及遞延税款

對所得稅釐定撥備時,需要作出重要的判斷。許多交易及計算的最終釐定無法確定。當最終的稅款結果與最初記賬金額不同時,有關差額將影響釐定期間的當期稅項和遞延稅款資產及負債。

當管理層認為將來很有可能有應課 税溢利以抵銷暫時性差額或可使用 税務虧損時,有關若干暫時性差額及 税務虧損的遞延税項資產予以確認。 實際使用的結果可能不同。

(b) 存貨撥備

於綜合收益表撇銷的金額為存貨的 賬面值與可變現淨值之間的差額。於 釐定可收回的存貨成本時須作出重 大判斷。於作出有關判斷時,本集團 會評估(其中包括)以任何方式收回 金額的時間及情況。

(c) 應收款項減值

本集團基於對違約風險及預期虧損率之假設對應收款項減值計提撥備(附註3.1(b)(ii))。於結算日,本集團根據集團過往記錄及當前市況以及前瞻性估計,判斷該等假設及選擇計算減值之輸入數據。

11 INCOME TAX EXPENSE (continued)

Pursuant to the Corporate Income Tax Law of the PRC effective from 1 January 2008 (the "CIT Law"), companies in the PRC are subject to income tax of 25% unless preferential rate is applicable.

- Pax Computer Technology (Shenzhen) Co., Ltd. ("Pax Computer Shenzhen"), a wholly owned subsidiary of the Company, is located in the Shenzhen Special Economic Zone. Pursuant to Caishui [2016] Circular 49 jointly released by the Ministry of Finance, the State Administration of Taxation, the National Development and Reform Commission and the Ministry of Industry and Information Technology of the PRC, management performed self-assessment on the eligibility for the tax incentives. Management estimated that Pax Computer Shenzhen was qualified as a National Key Software Enterprise and entitled to the preferential corporate income tax rate of 10% for the year ended 31 December 2018 (2017: same). The application of the preferential tax rate is a critical accounting estimate as set out in Note 4(a) to these consolidated financial statements.

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all potentially dilutive ordinary shares. The Company has one category of potentially dilutive ordinary shares: share options. For the share options, a calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average market share price of the Company's shares for the period) based on the monetary value of the subscription rights attached to outstanding share options. The number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the share options.

16 INTANGIBLE ASSETS (continued)

Amortisation of HK\$4,840,000 (2017: HK\$5,008,000) has been charged to administrative expenses.

The relevant goodwill is allocated to the respective groups of CGUs, which represent the lowest level within the Group at which the relevant goodwill is monitored for internal management purposes, and not larger than an operating segment.

As at 31 December 2018, the Group's goodwill of HK\$19,215,000 (2017: HK\$20,039,000) and HK\$29,586,000 (2017: HK\$30,969,000) is attributable to the acquisition of Kwang Woo Information & Communication Co., Ltd and its subsidiary ("Kwang Woo") and the operation in Italy respectively.

The recoverable amounts of CGUs are determined based on a value in use calculation. The calculation uses pre-tax cash flow projection based on financial budgets approved by management covering a five-year period. Thereafter, the cash flows are extrapolated using the terminal growth rates not exceeding the long-term average growth rate of the countries in which the CGU operates.

Impairment test for goodwill arising from the acquisition of Kwang Woo and the operation in Italy

The key assumptions are as follows:

16 無形資產(續)

攤 銷4,840,000港元(二零一七年:5,008,000港元)已自行政費用扣除。

相關商譽分配至有關現金產生單位組別。 現金產生單位指就內部管理目的而對相關 商譽進行監督的本集團最低層級,並且不得 大於一個經營分部。

於二零一八年十二月三十一日,本集團的商譽19,215,000港元 (二零一七年: 20,039,000港元)及29,586,000港元 (二零一七年: 30,969,000港元)乃分別來自收購 Kwang Woo Information & Communication Co., Ltd and its subsidiary (「Kwang Woo」)以及意大利的業務。

現金產生單位的可收回款額基於使用價值 計算釐定。該計算根據管理層所批准的五年 期財政預算採用税前現金流量預測進行計 算。此後,推斷現金流量所採用的終端增長 率不會超過現金產生單位經營所在國家的 長期平均增長率。

對收購Kwang Woo及意大利的業務所產生的商譽進行減值測試

主要假設載列如下:

		Kwang Woo		The operat 意大利	,
		2018 二零一八年	2017 二零一七年	2018 二零一八年	2017 二零一七年
Pre-tax discount rate Compound annual growth rate Terminal growth rate	税前貼現率 複合年增長率 終端增長率	9.3% 17.1% 2.0%	9.3% 7.6% 2.0%	19.9% 16.2% 2.0%	20.3% 23.2% 2.0%

The recoverable amount calculated based on value in use exceeded carrying value as at 31 December 2018 and 2017. An increase in pre-tax discount rate by 1.0% (2017: 1.4%) and 0.8% (2017: 0.3%) would remove the remaining headroom for Kwang Woo and the operation in Italy, respectively.

於二零一八年及二零一七年十二月三十一日,根據使用價值計算的可收回款額超過賬面值。税前貼現率增加1.0%(二零一七年:1.4%)及0.8%(二零一七年:0.3%)將分別抵銷Kwang Woo及意大利的業務的剩餘差額。

30 DEFERRED INCOME TAX (continued)

Deferred income tax assets are recognised for tax losses carry forward to the extent that the realisation of the related tax benefit through future taxable profits is probable. At 31 December 2018, the Group has unrecognised tax losses to be carried forward against future taxable income amounted to HK\$217,366,000 (2017: HK\$177,436,000). Tax losses amounting to HK\$217,366,000 (2017: HK\$177,248,000) will expire from 2023 to 2038 (2017: 2022 to 2037). The remaining tax losses have no expiry date. The potential deferred income tax assets in respect of these tax losses which have not been recognised will be calculated based on the effective income tax rates according to prevailing tax laws and regulations in which the Group operates.

Cai Shui 2008 Circular 1, which was jointly issued by the Ministry of Finance and the State Administration of Taxation, took effect on 22 February 2008. Under the circular, dividends declared by foreign investment enterprises ("FIEs") to foreign investors out of their cumulative retained earnings as at 31 December 2007 shall be exempt from withholding income tax. For dividends declared out of profit earned after 1 January 2008, withholding income tax will be levied on the foreign investor at a tax rate of 10% unless the foreign investor's jurisdiction of incorporation has a tax treaty with the PRC that provides for a different withholding tax arrangement.

As at 31 December 2018, deferred income tax liabilities have not been provided for in the consolidated financial statements in respect of the withholding tax that would be payable on unremitted earnings of the PRC subsidiary of the Company amounting to approximately HK\$90,888,000 (2017: HK\$102,179,000), as the Group is able to control the timing of the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future.
